Place of Posting Hyderabad

One of the leading Bank,

Grade AVP/DVP

Salesforce Architect:

We are looking for an experienced Salesforce Solution Architect to drive cross functional projects. As a Solution Architect, you will be responsible to provide end to end solutions using Salesforce and Salesforce products and also mentor the Salesforce team.

Responsibilities:

- Develop custom solutions and integrations on the Salesforce platform using
- Apex, Visualforce, Lightning Web Components and other Salesforce development tools
- Provide technical leadership, guidance, and support to our internal users, including troubleshooting issues.
- Lead and mentor other developers to ensure our Salesforce solutions are scalable, maintainable, and aligned with our enterprise architecture and best practices
- Work closely with business stakeholders and other developers to understand business requirements and translate them into Salesforce solutions that align with our lightweight, consistent governance standards
- Ensure that our Salesforce solutions are secure, reliable, and available to our users
- Research and evaluate new Salesforce features and functionality, and make recommendations for adoption based on business needs and technical feasibility

- Assist in the design, development, testing, and deployment of Salesforce integrations and customizations
- Monitor Salesforce performance and identify areas for improvement and optimization
- Stay current with Salesforce releases, features, and best practices, and recommend enhancements to improve the platform's effectiveness
- Participate in the planning and execution of Salesforce projects and initiatives

#### Qualifications

- 10+ years experience in software engineering
- 5+ years of experience in Salesforce development, including developing custom solutions and integrations using Apex and Lightning Web Components
- Salesforce Developer certifications
- Strong understanding of the Salesforce data model, including relationships between objects and fields
- Strong experience with RESTful APIs, microservices, and server-side applications
- Proven leadership skills and experience in mentoring and guiding other developers
- Excellent communication, collaboration, and problem-solving skills
- Ability to work independently and as part of a team
- Comfortable with lightweight, consistent governance standards and best practices
- Experience with enterprise system implementations
- Experience with Agile methodologies and tools
- Experience with CI/CD tools (GitHub, Salesforce CLI, etc.) for Salesforce
- Strong problem-solving and analytical skills
- Excellent communication and interpersonal skills, with the ability to work effectively in a team environment
